Molding Machine

In order to manufacture an high precise insert molding product, a high precise molds and dies are required, of course an automatic insertion system, kinds of automatic checking systems and automatic packing system, etc. are required too.

Those machines are always built on the basis of a unified design concept.

MEIOH PLASTICS MOLDING CO., LTD. is prepared to package sale the synthetic production system that was cultivated for years.

Moreover, the ultra high-speed hoop molding machine which our company developed will be on sale to companies in the near future.

We are not to receive the orders only for productions, but sell the total system.

Please give us many requests soon.
