

Chosen for the “300 small and medium-sized enterprises with fine craftsmanship”

In 2006 our company was chosen by the Small and Medium Enterprise Agency of the Ministry of Economy, Trade and Industry as one company of "300 small and medium-sized enterprises with fine craftsmanship."

This "300 small and medium-sized enterprises with fine craftsmanship" is carried out by high craftsmanship technology of small and medium-sized enterprises that will support the Japanese business for the competition in the international market and on the basis for this key of economic activities, The Ministry of Economy, Trade and Industry will carries out this program. Judgment was performed across the nation for the 300 excellent companies with fine craftsmanship in many directions, such as products and service, management technique, ideas and visions in the management, achievements, and financial situations.

It is hard to see the state of being of the

manufacturing companies which plays the important role, but by expressing broadly and intelligibly to the people, that the motivation of small and medium-sized enterprises with the base technology will be pulled out much more, and furthermore there is also a target to make the younger generation to be more concerned about the manufacturing field and expectation is strongly felt by the Japanese economic world for the small and medium-sized enterprises with the manufacturing base technology.

Our company thinks that the following activities were esteemed in the selection.

- Original development of an ultra high-speed automatic hoop insert molding machine
- Foundation of the wholly owned oversea production base in Shanghai in 2002
- Establishment of a product supply organization as a result of honest subcontractors' exploitation activities in China
- High-level production engineering which starts from designing
- Attempts for developments and sales to outside company the high-speed molding machine only as a part maker

And it is very important that all these activities will be supported on the basis as “responding to the changes and cultivate the future with your own strength”, by the basis of these concepts, just all the employees who is doing the research and developments by repeating the trials and errors, the skills will be concentrated by the staff, was contributed to this selection greatly.

In the world technical development competition that continues to change intensely, the Meioukasei group will steadily change broadly. Continuing not to remain in domestic business, to take in advance the needs of various customers from countries all over the world and moreover to response as a total supplier, as one company which performs craftsmanship and at the same time will expand the enterprise and technology to evolve is promise, and studying is repeated constantly from now on.
